

Your Visual Asset Inspection Needs on One Platform

Unleash live is an enterprise-grade image and video analytics platform that improves asset management through real-time and integrated data, offering greater control over wind farm operations. We work with 50+ globally recognized brands in the Energy, Renewable, Utilities, and Public Infrastructure sectors.

Provide camera or drone control to a remote operator

Scalable deployment, no additional hardware

Auto upload, tag, annotate and share media

Zero latency streaming in HD - bring experts closer to the action

Accessible from a browser for unlimited viewers

Rapid setup, connect to Unleash live platform in minutes

Generate reports and analytics

2 way audio communication

Custom Industrial AI Apps

UNLEASH LIVE | WEIDMULLER

Comprehensive Solutions for the Wind Sector

Weidmuller's Rotorblade CMS BLADEcontrol® partners with Unleash live to enhance wind turbine efficiency. BLADEcontrol® boosts turbine availability, reduces downtime, and ensures efficiency through robust condition monitoring. Integration with Unleash live's drone platform enables easy and secure automated drone flights.

This collaboration optimizes wind farm operations, improving energy efficiency, reliable power transmission and data-driven insights for modern wind farms' needs.

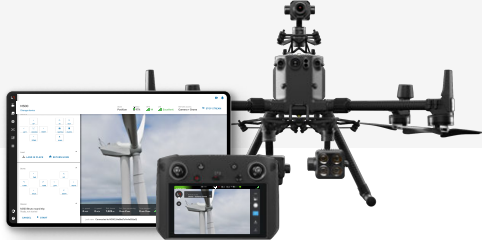

Product family

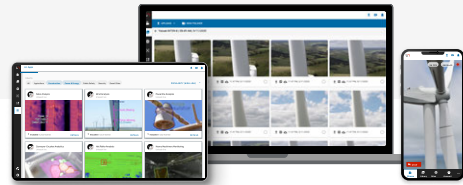

Unleash live comes together with in-field App & Cloud platform

Ground Control System (GCS) for drones

Desktop, iPad & mobile software platform

Connecting precise observations to better operational action

Unleash live provides a connected workflow to enable better and faster action

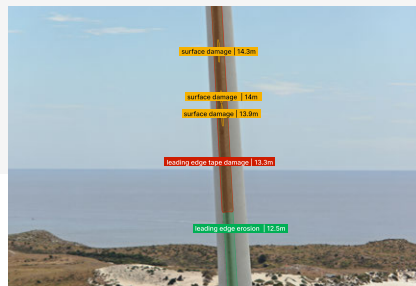

1 COLLECTION

- + True remote operational control and data capture accuracy
- + Automated inspections, with optimized flight paths for specific asset types
- + Live stream footage to the command center to make decisions in real time

2 INTERPRETATION

- + Instant AI analytics
- + Fault and component detection
- + Condition monitoring
- + Customized to internal inspection and maintenance standards

3 ACTION

- + API for automated work order generation
- + Integrated into your workflow
- + User based customized reports for detailed insights
- + Tailored insights
